'I GUARANTEE THE QUALITY OF OUR PRODUCTS!'

Only a truly natural, healthy and delicious product is called milk

STEFAN DUERR
EKONIVA GROUP PRESIDENT

EkoNiva-Food is one of the most dynamically developing milk processing companies. Our professional team produces a wide range of dairy SKUs to meet the needs of various audience groups.

The vast geographical reach of our dairy farms and milk plants, adherence to the 'from field to shop shelf' principle as well as the uniform standards of high-tech production ensure consistently high product quality.

We are No. 1 raw milk producer in Russia and Europe, which stimulates us to keep extending the product range.

EkoNiva is No. 3 raw milk producer in the world, which allows us to gain global recognition and export our products.

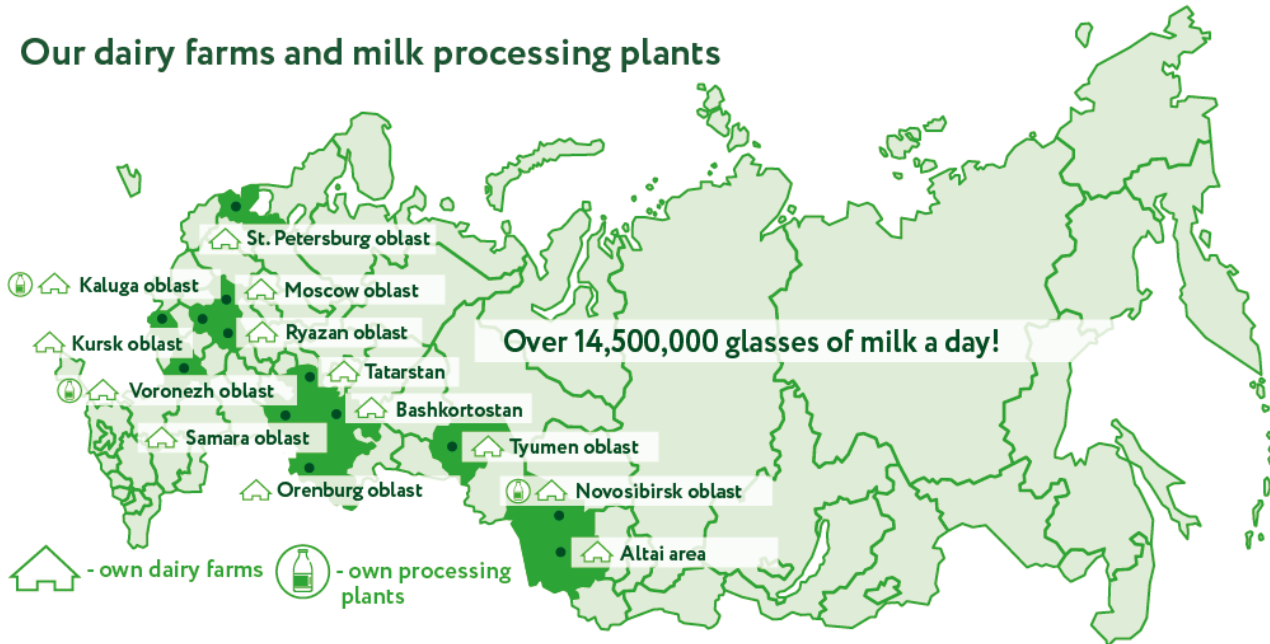

Own dairy farms are located in 11 regions of Russia, which makes us closer to the ultimate consumer across the country.

We milk over 112,000 cows, which ensures stable operation due to own raw milk production.

Our dairy farms and milk processing plants

Full production cycle based on 'from field to shop shelf' principle

Employees

A team of highly qualified specialists at each production stage.

Fodder preparation

Formulation of a perfectly balanced ration tailored to each cow's needs.

Young stock raising

Advanced methods of young stock feeding and housing.

Sales of products

EKONIVA dairy produce is sold all over Russia.

Milk processing

Dairy products are manufactured at 4 processing plants.

Raw milk production

Stress-free milking in rotary parlours.

EKONIVA pasteurised milk is made from natural premium-quality milk produced on our own farms. It contains easily digestible milk protein, trace elements and vitamins.

In order to make the product safe without changing its authentic taste, the processing plants apply pasteurisation – gentle heat treatment of milk without boiling. During this process, harmful microorganisms are destroyed, and the beneficial microflora and vitamins are preserved.

The pasteurised milk is perfect for creating your favourite dishes, marinades, sauces and milkshakes.

Superior - quality milk produced in accordance with the organic standards

From 2012 to 2015, Savinskaya Niva farm converted from conventional to organic farming. All crop and livestock products on our farms are certified in accordance with the European standard EU 834/2007 and the Russian standard GOST 33980-2016.

Pedigree cows of Simmental and Ayrshire breeds graze freely in the fields and live in tune with the nature choosing their own ration from a variety of organic plants grown with no mineral fertiliser or crop protection agents applied.

The ORGANIC line undergoes the stringent quality control – the entire production cycle from growing forage crops in the company's fields to packaging finished goods is closely monitored. The organic production process does not involve any use of GMOs, vegetable fats, food colourings, stabilisers or thickeners.

To make sure you buy an organic product, pay attention to the packaging. The major distinctive feature is the logo 'Organic'.

ORGANIC is a logo confirming the compliance with the requirements for organic foods sold in the Russian Federation.

'Euro Leaf' is a logo verifying the compliance with the organic farming regulations established by the European Union.

Group package: 10 pcs

EKONIVA kefir, ryazhenka and snezhok are traditional dairy fermented products made from the highest quality milk with the addition of a starter.

Kefir is produced by fermenting milk with special grains from a group of lactic acid bacteria. The product contains easily digestible protein and is rich in trace elements and vitamins. Kefir goes well with dried, sun-cured or frozen berries. It will perfectly complement whole-grain meals, porridges, muesli and wholemeal bread.

Ryazhenka is made from baked milk and thermophilic starter cultures. The drink will supplement your diet or will be a good ingredient for cooking thin or fluffy pancakes, pastry or desserts.

The fermented drink Snezhok with a creamy-sweet flavour is produced with the use of sugar and a starter containing *Lactobacillus bulgaricus*. The product is full of vitamins, macro- and trace elements. It will make an ideal healthy snack or an ingredient for baking. Try mixing the drink with your favourite fruits in a blender to create a delectable smoothie.

SOUR CREAM
15% fat

Group package: 6 pcs

EKONIVA sour cream is a traditional product made from cream with the addition of a starter.

The product contains easily digestible protein, vitamins and essential trace minerals.

Our bodies are able to digest sour cream easily and quickly due to the high content of lactic acid bacteria making it a wholesome product for people of all ages. EKONIVA sour cream goes perfectly with curds, greens and potatoes. The product is easy to whip so it is an excellent choice for making desserts and baking pastry. Sour cream accentuates the taste of fresh and dried fruits, honey and jam. Meat, poultry, fish and mushrooms braised in sour cream get a delicate creamy flavour.

Group package: 8 pcs

EKONIVA curds lineup includes traditional curds and quark. Due to their high nutritional value, the products enrich the diet of people leading a healthy lifestyle.

EKONIVA traditional curds have a dryish grainy consistency and are made from top-quality milk with the use of fermentation starting bacteria.

In cooking, EKONIVA curds with a fat content of 9% can be used both as the main ingredient in a variety of dishes, including syrniki (curd fritters) and cheesecakes, and as a delicious filling for pies, vareniki (dough parcels with curds), vatrushkas (curd patties) or buns. To make curds softer and more tender, you can use a food grinder or a sifter. EKONIVA quark is made from top-grade milk and special live cultures. To create mouth-watering quark desserts, add fruits and berry jam. The delicate creamy consistency brings out the flavour of fruits and berries while the high content of easily digestible protein makes it a wholesome and delicious dessert for a healthy diet. EKONIVA quark will be a perfect addition to desserts with granola, cereals, nuts and toppings.

Mold culture Brevibacterium linens

EkoNiva uses Brevibacterium linens for natural maturing of washed-rind cheeses. Colonies of Brevibacterium linens produce pigments which give washed rinds their characteristic orange colour and impart a unique aroma.

Premium hard cheese Dürri

The 3 month-aged hard cheese Dürri has a slightly piquant flavour with a spicy note. The cheese can be served with fruit, nuts or fresh bread. It can also be used as an ingredient for hot dishes.

The 6 month-aged cheese Dürri with its piquant flavor, herbal notes and a distinct aroma is a perfect choice for a cheese platter and an ideal ingredient for sauces, cheese fondue, pizza or pasta.

The 12 month-aged cheese Dürri 12 with its rich, herbal, piquant flavor and a distinct aroma is an excellent addition to a cheese platter and a perfect match for white or red dry wine.

A new level of quality

Milk is a unique gift of nature, and we have all the necessary technologies to make the most of this gift at our cheese plants. We offer a product that gives a start to a totally new generation of cheese in Russia.

In order to create ice cream with a perfectly creamy flavour, we have examined the best samples of this popular treat in Russia and Europe. We have selected the ingredients for our product with utmost care:

- premium-quality milk from our own dairy farms;
- genuine Belgian chocolate;
- berry filling made from sweet strawberries to produce strawberry plombir.

We make every effort to preserve the health benefits of milk in the universally loved dessert. It is important to us to make sure you fully enjoy the natural taste of the delicious treat. EKONIVA ice cream is free of any artificial additives, colourings or vegetable fats.

Group package: 12 pcs

EkoNiva adheres to the 'from field to shop shelf' principle and takes a responsible approach to the formulation of balanced cow ration. It enables us to produce milk with a high content of natural protein and an optimum amount of carbohydrates.

All this makes EKONIVA Professional Line a perfect basis for latte art as it can be easily whipped into a dense thick foam with virtually all kinds of coffee machines. The addition of cream will impart exquisite tender taste and rich flavour to your coffee.

MILK WITH A HIGH CONTENT OF NATURAL PROTEIN FOR MAKING A STABLE FOAM
